Balance Information: We use the average daily balance method to calculate interest on your account. This method applies a periodic rate to the average daily balance in the account for the period. The average daily balance is calculated by adding the principal in the account for each day of the period and dividing that figure by the number of days in the period. We will use an interest accrual basis of 365 (or 366 in leap year) for each day in the year. You must maintain a minimum balance of \$100.00 in the account each day to obtain the disclosed annual percentage yield.
